

TOXICITY

there is a segment of the population of this planet that
has stopped learning

there is also a segment of the population of this planet
that has lost the capacity to learn
what have these people become?

it has been established over and over again that our way
of life has become suicidal on the large scale
and though there are some who are able to change and are
on the look out to change their ways

it is becoming frightfully apparent that there does exist
some form of being that is – at this point – unable to
change its ways

what does this imply?

i'm not sure really

years and decades and centuries of moving in a particular
direction, and at the culmination of it we have these
'living' things that are able to take from the earth
use these materials and in the process create by-
products that we cannot use

we call it pollution

toxicity

it takes many forms

and it is increasing

rapidly.
