

TOXICITY

there is a segment of the population of this planet that has stopped learning
there is also a segment of the population of this planet that has lost the capacity to learn
what have these people become?
it has been established over and over again that our way of life has become suicidal on the large scale
and though there are some who are able to change and are on the look out to change their ways
it is becoming frightfully apparent that there does exist some form of being that is – at this point – unable to change its ways
what does this imply?
i'm not sure really

years and decades and centuries of moving in a particular direction, and at the culmination of it we have these 'living' things that are able to take from the earth use these materials and in the process create by-products that we cannot use

we call it pollution

toxicity

it takes many forms and it is increasing rapidly.
